EDUCATION

Queens College, CUNY
Anticipated Bachelor of Arts
Major: Computer Science

New York, NY
Expected December 2026
Information Technology Credits: 21

WORK EXPERIENCE

Dave & Busters

Support Technician

Times Square, NY

Nov. 2024-Present

- Provided customer-facing support, offering technical assistance to users to resolve hardware or software concerns quickly and efficiently.
- Supplied technical support and troubleshooting for a variety of arcade machines and gaming systems, addressing hardware and software issues swiftly to minimize downtime.
- Diagnosed and resolved issues related to electrical components, wiring, and software to ensure optimal performance, directly applicable to resolving IT and network issues in a help desk role.
- Collaborated with a team to maintain system functionality and resolve recurring technical problems, demonstrating strong communication skills essential for working with clients and team members in tech support.
- Documented repair processes and technical issues to improve troubleshooting procedures, similar to creating knowledge base articles for recurring help desk issues.

P.S. 199 Maurice A. Fitzgerald

Teacher Assistant

Queens, NY

Jul. 2021-Aug. 2022

- Developed communication skills by interacting with students and faculty to resolve issues with classroom tools and tech equipment, simulating a help desk user support experience.
- Provided technical support and troubleshooting for a variety of arcade machines and gaming systems, addressing hardware and software issues swiftly to minimize downtime.
- Managed time-sensitive tasks and provided timely assistance, which helped build multitasking and organizational skills useful in a fast-paced tech support environment.

PROJECTS

N-Queens Problem Solver

- Developed a C++ program to solve the N-Queens problem using backtracking and constraint satisfaction techniques, demonstrating problem-solving and critical thinking skills.
- Utilized dynamic memory allocation for handling large datasets, ensuring efficient resource management, an essential skill for troubleshooting system performance issues.
- Built a visual interface to represent solutions, simulating problem resolution which mirrors real-time problem-solving in tech support.

Student Database Management System (C++)

- Created a user-friendly student database management system that included search and data retrieval functions, akin to troubleshooting and resolving client issues in a support role.
- Utilized object-oriented programming principles to create scalable, reusable code—similar to establishing efficient systems for resolving technical support queries.
- Ensured seamless data operations and effective user interaction, mirroring essential help desk duties of managing multiple user requests and technical tasks simultaneously.

SKILLS

Technical Skills:

- Troubleshooting hardware and software issues
- Operating systems: Windows, macOS, Linux
- Remote desktop support
- Network configuration and diagnostics
